# Weather Forecast

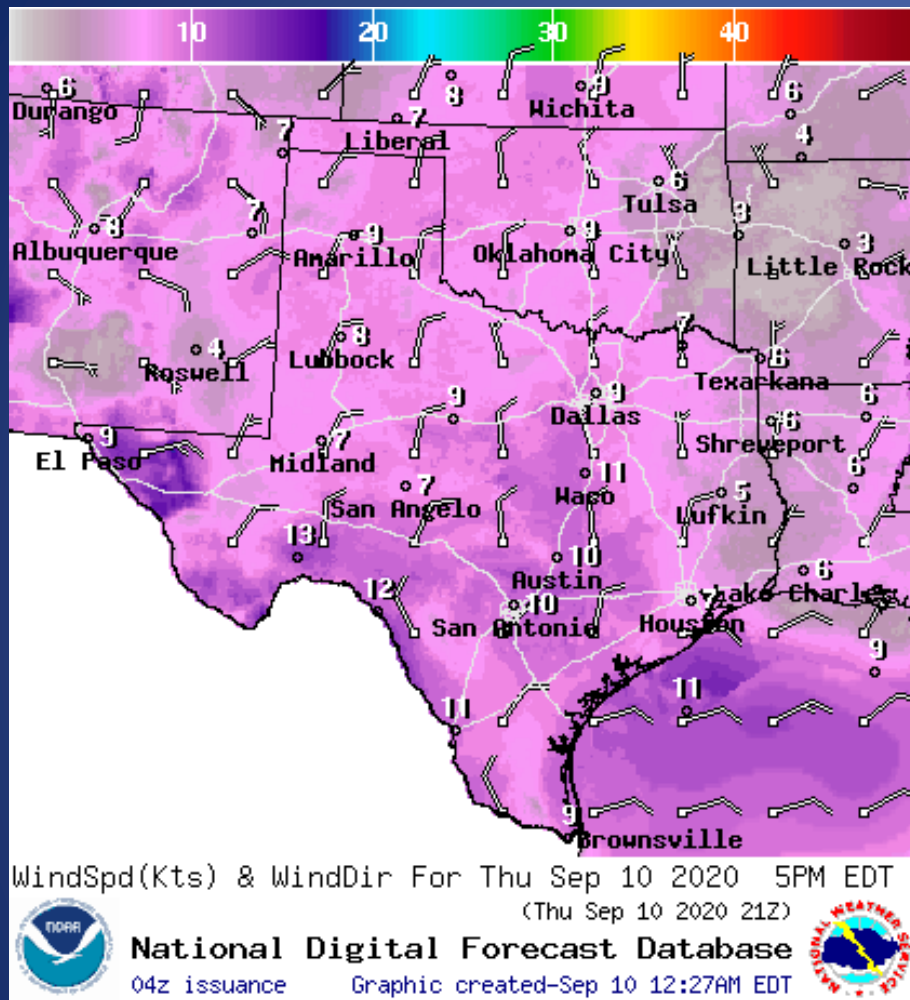

## Highs

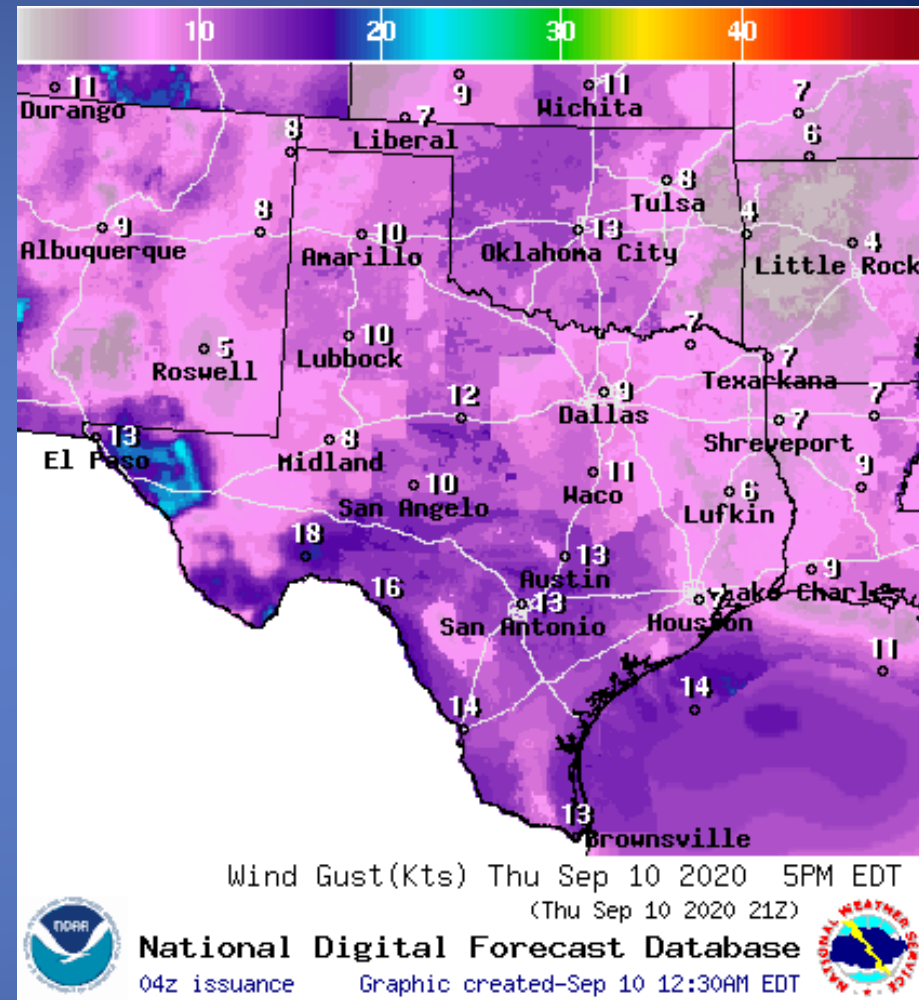

## Lows

# Weather Forecast

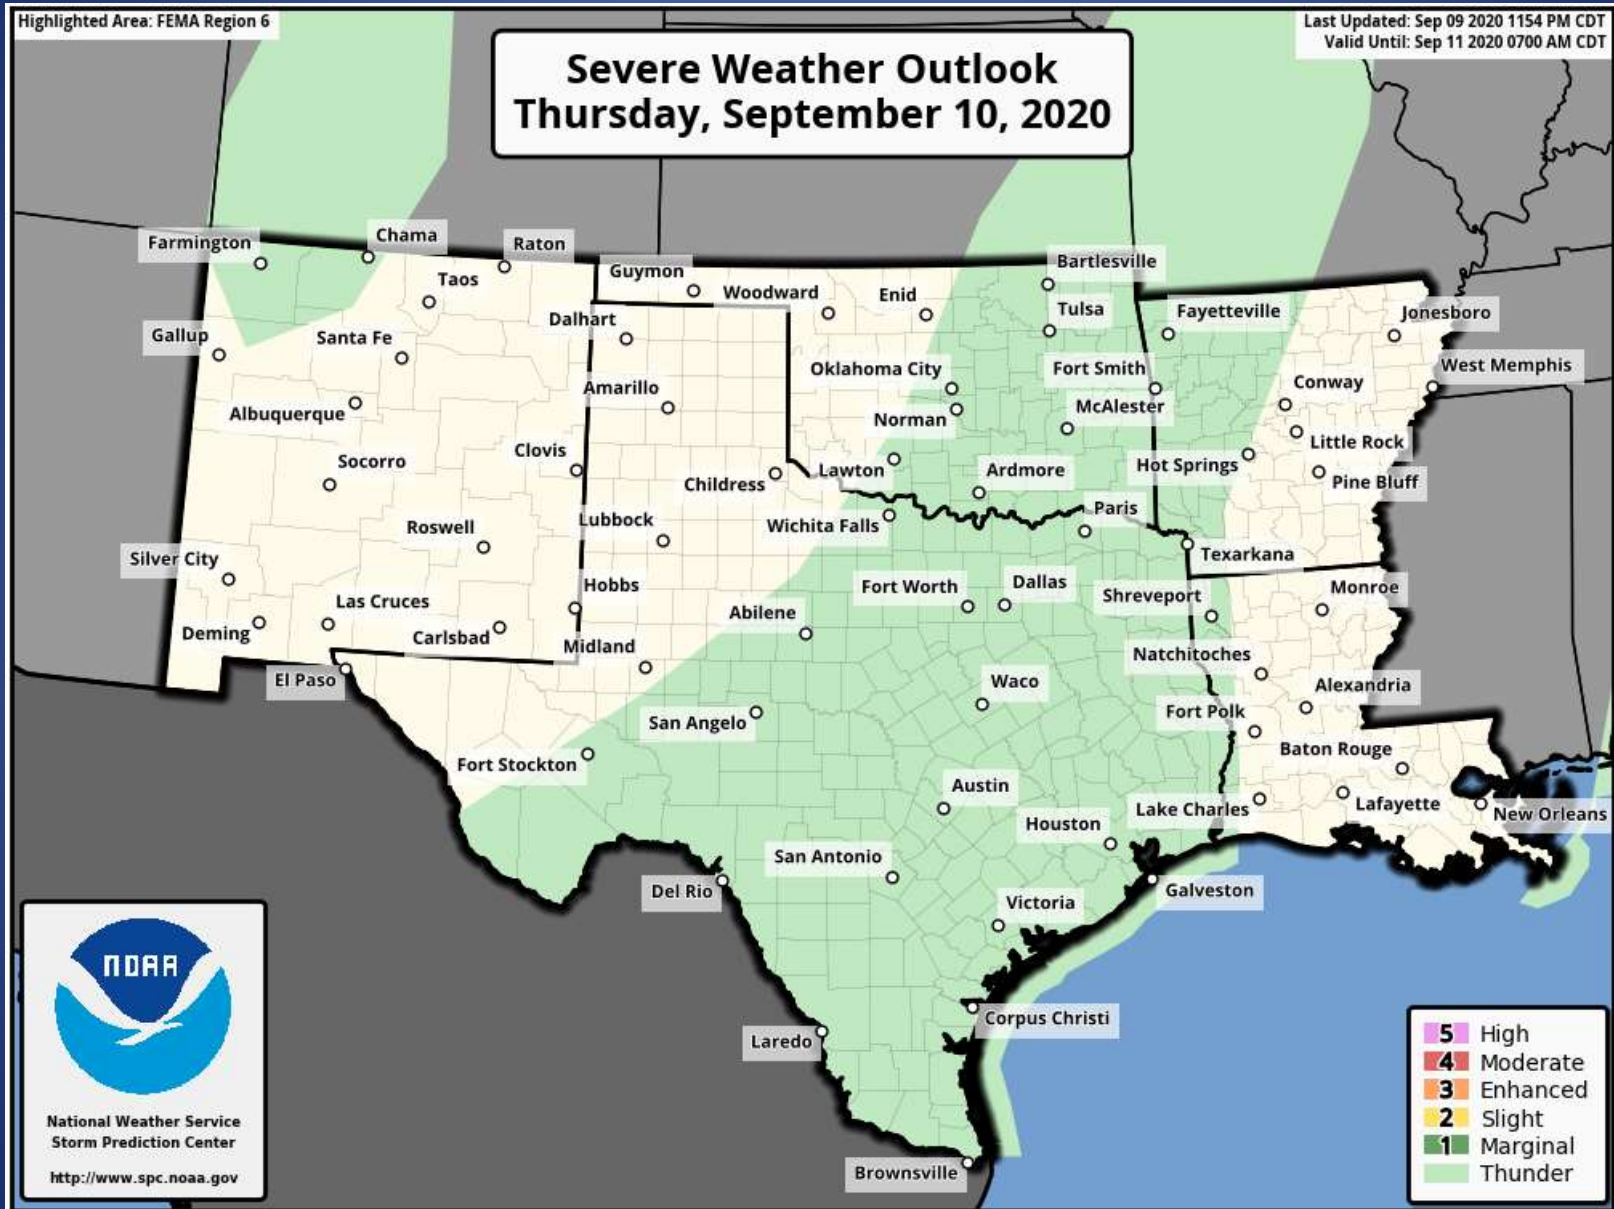

## Wind Speeds

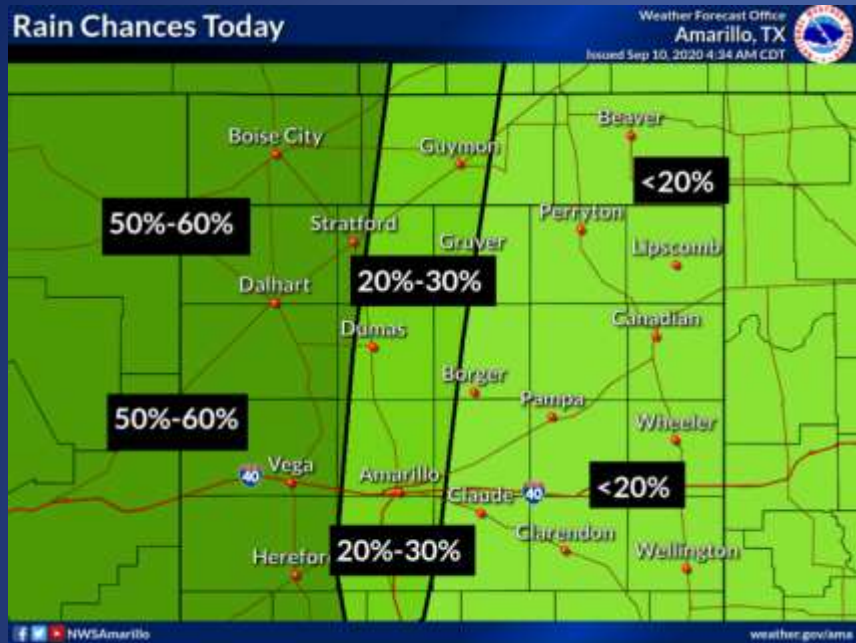

## Gusts

# Hazardous Weather

# Hazardous Weather

The best chance of rain will be across the western Panhandles today.

It will be cloudy and cool again today with spotty showers. The best rain chances will be across the Rolling Plains late this afternoon into tonight. Temperatures will be warmer than yesterday, but still about 30 degrees below average.

# Hazardous Weather

The upper level low will begin to exit the Four Corners region during the day on Thursday. This will allow rain chances to become more isolated, with the best chances being in the morning. The cloud cover will likely stick around for a good portion of the day, though some clearing will be possible in the afternoon. High temperatures will once again be well below normal, topping out in the lower to mid 70s.

Much cooler today with rain continuing. Most rain will be light, but heavier rain is possible from Junction to Ozona and southward.

# Hazardous Weather

Thursday

Cloudy. Cold Start to the day with decreasing rain chances

Weather Forecast Office

Fort Worth, TX

Issued September 10, 2020 3:55 AM CT

Morning Lows and Rain Chances

Afternoon Highs and Rain Chances

- Showers this morning will gradually diminish across the area, becoming scattered this afternoon over East and Western North Texas.
- West of I-35: It will start cold and remain chilly / East of I-35: Chilly start to the day will end somewhat mild

[f](#) [t](#) [v](#) NWSFortWorth

[weather.gov/fortworth](http://weather.gov/fortworth)

Much cooler today than yesterday with cloudy skies through the day. Showers this morning will gradually diminish through the morning with scattered showers remaining possible over East Texas and Western North Texas this afternoon. Areas west of I-35 will start cold this morning then remain chilly through the afternoon, while areas east of I-35 will start chilly and become mild this afternoon.

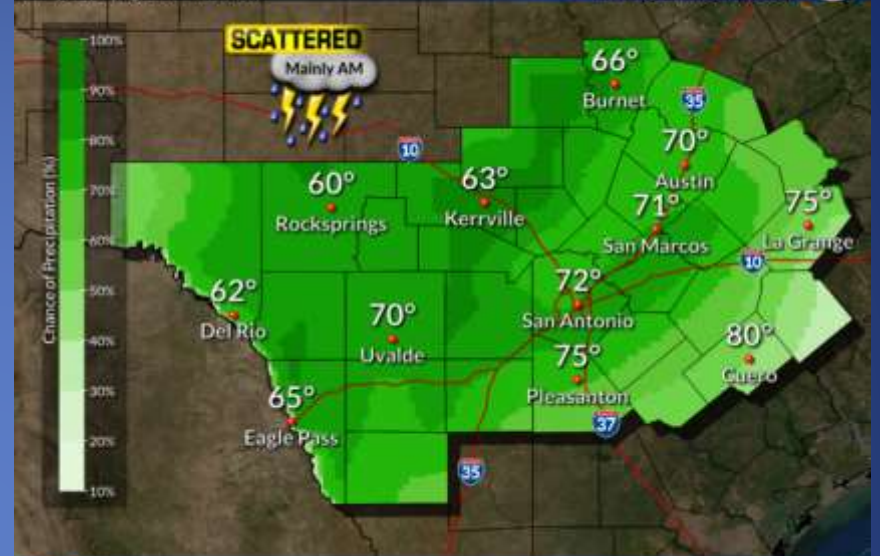

Seasonally cold with showers and isolated thunderstorms

Weather Forecast Office Austin/San Antonio, TX

Issued Sep 10, 2020 3:21 AM CDT

Mainly AM, drying out this afternoon.

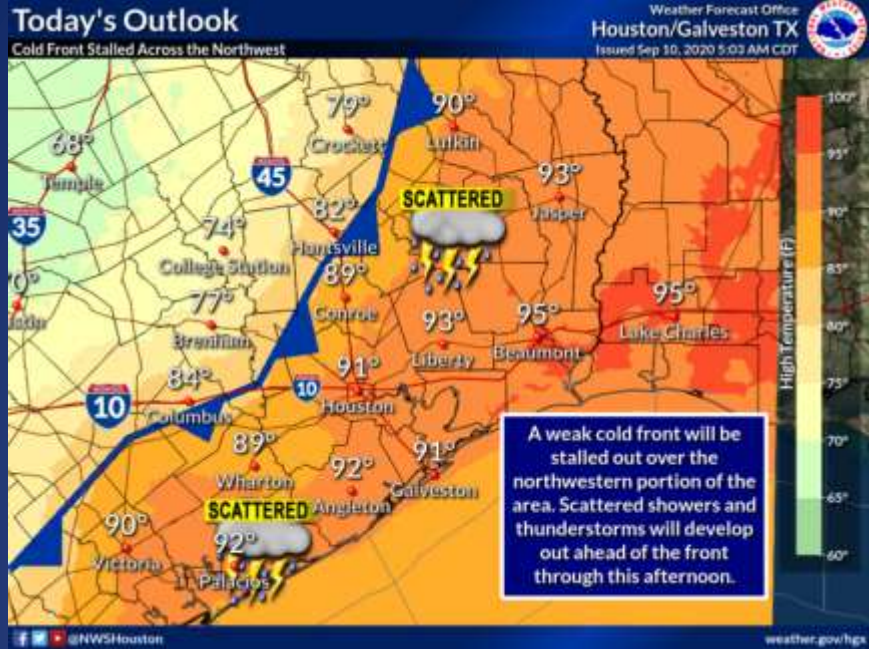

[f](#) [t](#) [v](#) NWSSanAntonio

[weather.gov/san](http://weather.gov/san)

Scattered showers and a few thunderstorms will continue over South Central Texas this morning and then diminish through the afternoon. A few isolated locations may still see locally heavy rainfall this morning. Otherwise, well below normal temperatures are expected today.

# Hazardous Weather

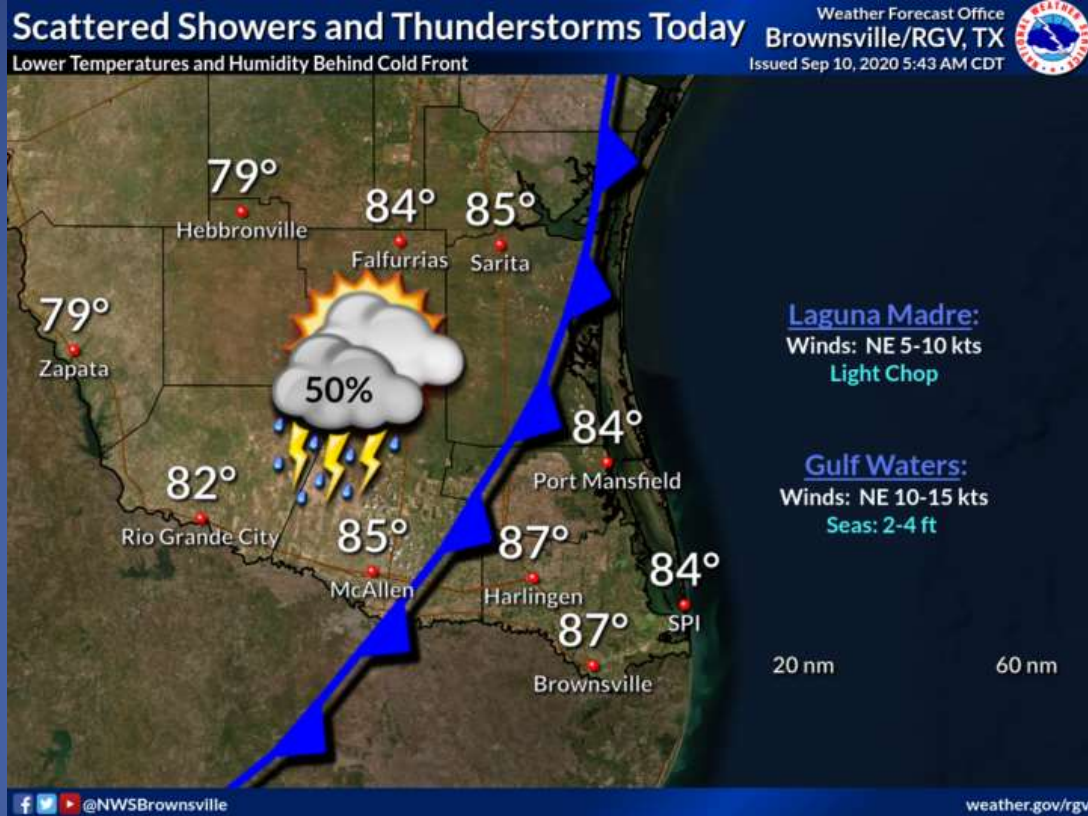

A stalled front over the northwestern portion of the area will bring scattered showers and thunderstorms through the day.

The combination of a frontal boundary and copious moisture will contribute to scattered showers and thunderstorms this morning over the Coastal Plains. Isolated to scattered showers and thunderstorms anticipated for this afternoon. Cooler, with maximum temperatures ranging from the mid 70s to the mid 80s.

# Hazardous Weather

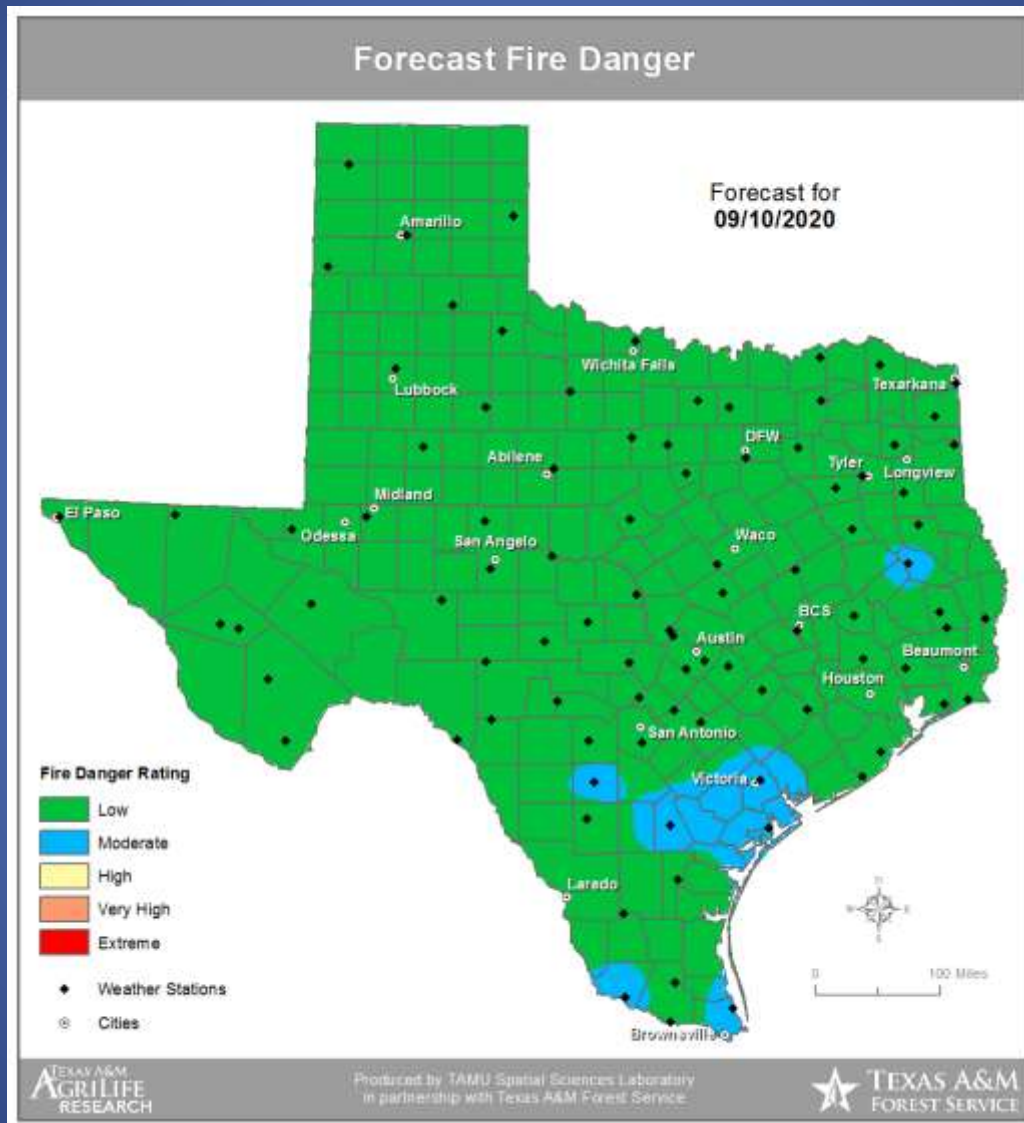

A weak cold front is moving through this morning and will bring increasing rain chances through the day. A few heavy downpours will be possible, so be sure to slow down and use caution. Temperatures and humidity will also be more comfortable this afternoon.

# Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
